## For Your Interior

Our existing range of SPC wood-effect floors is now being expanded with the Stone collection – décors with colours inspired by concrete and marble.

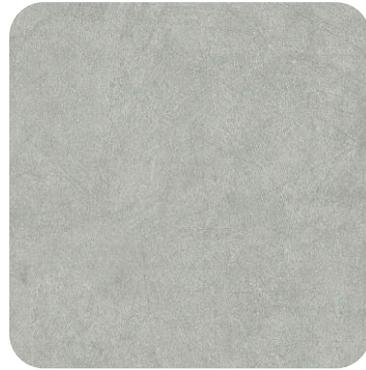

SPC vinyl flooring complements the SPC wall panel collection.

Both use the same patterns, but the entire flooring collection is matte and the panel itself has a stone-like look.

# Colours

Concrete Dust

Concrete Light

Concrete Beige

Rusty

Calacatta Snow

Calacatta White

Calacatta Black

Ash Grey

Marble Skin

Dark Stone

# SPC vinyl flooring

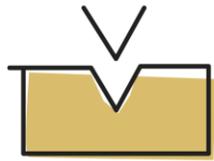

Thanks to the use of polymer technology, SPC (Stone Polymer Composite) vinyl flooring has high rigidity, durability, and strength.

It can be used in both domestic and public spaces.

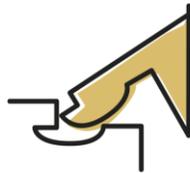

Thanks to the 20-year guarantee, you can be sure that this is the right choice.

# Advantages

V-groove around all edges

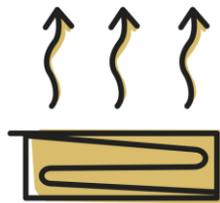

Drop lock

Stone look

High abrasion class

For underfloor heating

Waterproof material

# Waterproof material

SPC vinyl flooring is waterproof, making it suitable for bathrooms and kitchens. When used in these areas, it is recommended that it is glued, so that water does not penetrate under the panels and moisture does not form, as this could cause mould and unpleasant odours.

SPC vinyl flooring has **R10** anti-slip certification, which means you can safely walk on it even when your feet are wet after getting out of the bath.

## Abrasion class

AC5/33 – floor panels with this designation are characterised by very high abrasion resistance.

This abrasion class will therefore be suitable for very intensively used spaces, making SPC vinyl flooring a great choice for high-traffic public buildings.

# Floor installation

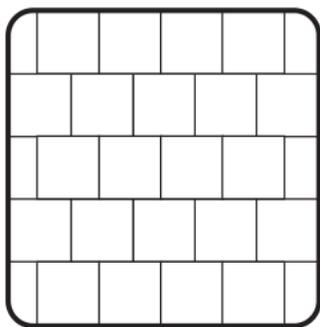

SPC floor installation is intuitive and simple. The panels are fitted with the **I4F drop lock**, which has numerous benefits:

- An exceptionally tight connection is ensured.  
Recommended for kitchens and bathrooms  
– impervious to standing water for up to 24 hours.
- This is a very strong and rigid connection – SPC flooring can be laid without expansion joints at doors, up to 10 lm (100 m<sup>2</sup>).
- Installation with the drop lock is 30% faster compared to fall down locks.

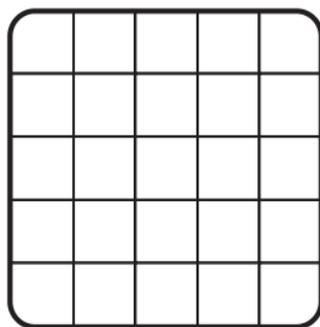

## I4F locking system

Thanks to the drop lock, SPC vinyl floors  
can be laid in two ways:

The so-called  
running bond pattern

The so-called  
stack bond pattern

## Underfloor heating

The product is suitable for rooms with water-based underfloor heating and its technical parameters make it an ideal floor for flats.

## Complementary product range

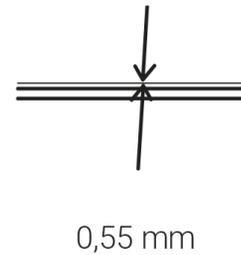

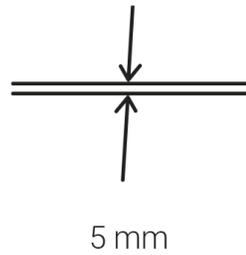

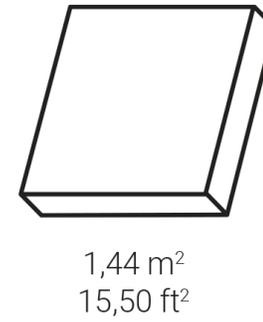

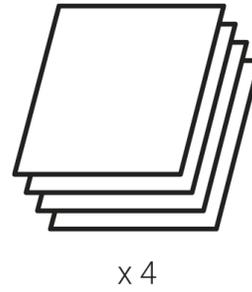

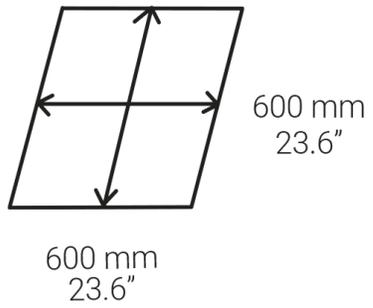

With the SPC vinyl flooring and SPC wall panels  
you can design the perfect interior.

SPC vinyl flooring: 10 patterns, 60 x 60 cm

SPC wall panels: 10 patterns, 30 x 60 and 60 x 120 cm
