THERMOPRINT TECHNOLOGY

- The panels in the Nature collection are made using thermal printing technology, which makes their surface highly resistant to mechanical damage and sunlight.

- The thermo-printing technology enables the wood grain to be reproduced faithfully. Panels stained in this way have a more diverse and unique wood grain.

VENTILATION - A GUARANTEE OF MANY YEARS OF USE

Installing soffit with perforation ensures proper air circulation and protects the roof from moisture, fungi, and mould.

The use of perforation is necessary to enjoy your dream home for years to come.

The perforation is located in the fold of the panel, therefore it is invisible after installation.

In addition, the shape of the perforation holes prevents the entry of insects such as wasps, hornets, and bumblebees.

PATENTED SOLUTION

The method of manufacture and type of perforation in a
panel with concealed perforation is a patented solution.

Application: ZWW no. 005216025 dated 06.04.2018.

PRODUCT CHARACTERISTICS

— Invisible, aesthetically pleasing ventilation

— Modern panel shape with wide slats

— Aesthetic design

— Possibility of installing various types of lighting

— Quick installation - thanks to the ventilation in the panel, there is no need to mount ventilation grilles

— Simple and effortless system

AESTHETIC DESIGN

The modern shape of the panel resembles two wide boards, and because the ventilation is concealed, a better aesthetic of the roof finish is achieved.

LIGHTING INSTALLATION

The shape of the panel with its two wide lamellas allows the lighting to be installed freely.

Thanks to the wide lamellas, the range of available light points has been extended.

COMPLEMENTARITY OF VOX SOFFIT AND SIDING

— Installation on a wooden substructure using the same construction tools.

— Universal trim (SV(P) 15 and 18 for VOX vinyl systems, in woodgrain colours.

— Soffit and siding panels from the Nature collection are made using the same thermal printing technology, so they look consistent.

— Colour consistency in the range of colours: White, Golden Oak and Winchester Oak.
